

HPS025

A must have on every sign shop! Light & portable.

Portable self-piercing eyelet press for clear plastic eyelets.

Our entry level hand press is the perfect tool for small sign shops. There is no need to work on a fixed position and you can easily set eyelets on your bench or ground.

This eyelet press has been designed to set clear eyelets on different materials such as PVC banners, Coroplast ... but not on fabrics where it can create wrinkles around the eyelet.

Product dimension	7x 23 x 44cm.
Available for	Ø8 o Ø12 o Ø16mm
Material thickness	Max. 10 mm
Throat depth	Max. 95 mm
Weight	4,6 kg

○ Low productivity

For PVC banners

Not for fabrics

Reasons to choose HPS025:

- No need to pre-cut the material, machine does cutting and setting in a single operation.
- Offered as a package deal: hand press, die and 250 clear eyelets.
- Available for **Ø8, Ø12 or Ø16mm. Each size requires extra tooling.**
- Portable, move the press and not the banner.
- European manufacture.

HandPro

Perfect for mid-size customers.

HandPro is the latest PLASTGrommet development in eyelet presses for the growing fabric market. It has been designed to work bench mounted and customer can easily adjust closing of the eyelet so it doesn't roll even on light fabrics.

Product dimension	62 x 23 x 8 cm.
Available for	Ø8 o Ø12 o Ø16mm
Material thickness	Max. 10 mm
Profundidad cuello	Max. 90 mm
Weight	8,5 kg

 Medium productivity

For PVC banners

For fabrics

Reasons to choose HandPro:

- It works on a wide range of materials: fabrics, corrugated plastics, clear foil, PVC banners ...
- Adjustable cutting pressure, necessary to work with fabrics.
- Adjustable eyelet closing pressure, even on thin fabrics material will not roll.
- HandPro uses same kind of tooling as the advanced Multipress.
- Bench mounted.
- Available for 8mm, 12mm and 16mm PLASTGrommet eyelets.

HPS020

Entry-level hand press, bench-mounted.

HPS 020R works on a fixed position for easier operator use. There are two types of dies available: self-piercing, like the ones on hand press HPS 025 -for customers setting eyelets on PVC banners,- and the dies that require pre-cut, specially designed for fabrics as they do not create wrinkles.

Self-piercing dies are only available for the smallest sizes (8, 12 and 16mm) whilst the others are available for all eyelet models.

Product dimension	7 x 20 x 63 cm.
Available for	Ø8, Ø12, Ø16, Ø25, Ø40, mm
Material thickness	Max. 10 mm
Throat depth	Max. 95 mm
Weight	8 kg

○ Low productivity

For PVC banners

For fabrics

Pre-cut

Option 1 (PVC)

Self-piercing for:
Ø8, Ø12 y Ø16mm

Option 2 (Fabrics)

Needs pre-cut but no need to change the tooling.

Ø8, Ø12, Ø16,
Ø25 y Ø40mm

Reasons to choose HPS020:

- Available with two types of dies, for PVC banners and for fabrics.
- Self-piercing for PVC banners and with pre-cut for fabrics.
