

NETROLL NEW DISPENSER FOR HAND USE

We are happy to present you the new dispenser for hand use for 450mm and 500mm rolls.

An innovative solution which makes the palletizing much easier!

NEW

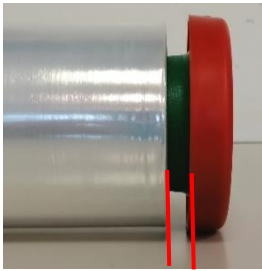

PATENT PENDING
PATENT PENDING
PATENT PENDING

Patent ID: 81202000045802

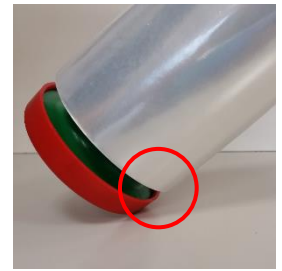

The dispenser is produced from a polyolefin mix of PE/PP which makes it very light and trendy, resistance, flexible and adaptable at the internal part of the roll. The form is ergonomic and the usage is very easy and friendly with the worker.

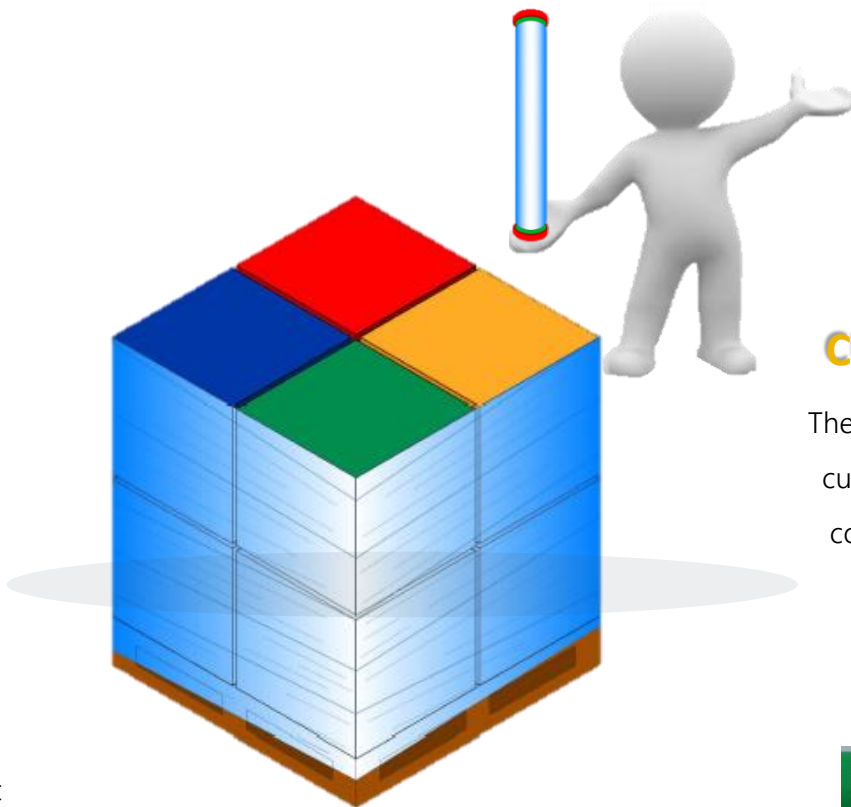

ANTISHOCK

The special form and structure was studied especially to be user friendly and resistant. In case of accidental fall or drop of the roll, the dispenser is not breaking.

Light and comfortable, the dispenser can be used with or without protective parts.

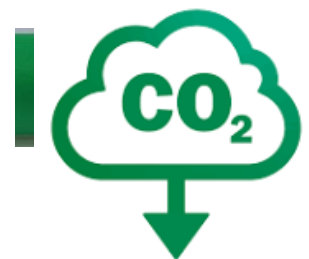

CUSTOMIZED

The dispenser can be customized in your company's colors.

SUSTAINABLE

By not using cardboard cores, for each pallet of film purchased, CO2 emissions are reduced by 98 kg, the equivalent of a 500 km journey with a medium-sized car.
